Background details relating advertisement for inviting Expression of Interest (EOI) For Project Management consultancy work at NUEPA

1. Background:

National University of Educational Planning & Administration (NUEPA) is under the administrative control of Ministry of HRD, Government of India and is fully funded by it.

It has been allocated an additional land measuring about 2100 sq. mtr. adjacent to its present premises. The University proposes to construct a Multi Storeyed Building on the above piece of land for its Academic Departments, Centres, Libraries and other facilities which are normally required by an University establishment. The works to be carried out consist of designing and execution building & construction work relating to site development civil works, electrical works, furniture and fixtures, false ceiling, workstations, modular furniture, soft furnishing & lifts etc. on turn key basis to enable the university to locate & operate its activities at the earliest from new building. The building will serve the purpose of a public university where a large number of general public including students, academicians, administrators and trainees are expected to visit everyday.

2. Scope of the work:

The scope of work for the selected agency includes a complete and comprehensive architectural concept designing, execution of construction work including interior work and furnishing of the said building, overall consultancy and supervision of work and execute the work ensuring time, cost & quality parameters set for the project. The agencies who are interested to take up the above project and provide project management consultancy will be required to submit their expression of interest with concept design for the building along with their financial bid which should be kept in separate covers.

The designs and interiors of the building must keep in view space illumination system in such a way that there is a minimum use of electricity. The illumination system should preferably meet the IGBC (Indian Green Building Council) design standards or LEED criterion or "Griha" norm. The AC and fresh air interior layout should meet the fresh air standards of ECDC (Energy Conservation Building Code) and BEE (Bureau of Energy Efficiency). The selection of equipment should be energy efficient and the proposed materials to be used should have least negative impact on the environment. The design of interiors and its execution should also incorporate a fire fighting system and Disaster Management provisions. The project work is required to be completed within a period of one year from the date of award of work.
